

Trumbull™

TRUPAVE® ENGINEERED PAVING MAT
TRUE PERFORMANCE. TRUE PROTECTION.

PROJECT NAME:

County Road 7 & 8

LOCATION:

Oklee, Minnesota

AUTHORIZED DEALER:

Road Fabrics, Inc.

INSTALLED BY:

Road Fabrics, Inc.

PAVING CONTRACTOR:

North Star Materials

AREA INSTALLED:

15,000 sq. yds.

EXISTING PAVEMENT TYPE:

Asphalt

INSTALLATION DATE:

July 2005

TRUPAVE® ENGINEERED PAVING PROJECT PROFILE

Minnesota's Department of Transportation and Red Lake County used County Roads 7 & 8 as test sections for Trupave Engineered Paving Mat. Along with the Trupave they also used a 6oz nonwoven fabric to see which product would perform better. Every cracks location was documented to better see the benefits of the Trupave. They used 9,400 square yards of 3 foot strip along the center line (above right picture) and 6,000 square yards of full width Trupave across a different section (above left picture). Sections of TruPave were laid on top of the existing surface and on top of a leveling binder.
