Road Fabrics, Inc.

PAVING CONTRACTOR:

Geneva Construction

AREA INSTALLED:

36,000 sq. yds.

EXISTING PAVEMENT TYPE:

Asphalt

INSTALLATION DATE:

June 2005

TRUPAVE® ENGINEERED PAVING PROJECT PROFILE

The city of Warrenville, in an effort to extend the maintenance life of their roads, elected to use TruPave engineered paving mat in the pavement section of an existing subdivision (above left). With the development of longitudinal and transverse cracking, the existing surface was milled up. Full width TruPave engineered paving mat was installed on a leveling binder with a 2" overlay on top.

Included in the cities plan to extend their maintenance cycle, 6000 sq. yds. of TruPave was also installed in the center of town (above right).
