

GLASGRID®

PAVEMENT REINFORCEMENT SYSTEM

PROJECT NAME:

Carriageway Drive Resurfacing Oct. 2009

LOCATION:

Arlington Heights, IL

AUTHORIZED DEALER:

Road Fabrics, Inc.

INSTALLED BY:

Road Fabrics, Inc.

PAVING CONTRACTOR:

Arrow Road Construction

AREA INSTALLED:

782 sq. yds.

INSTALLATION DATE:

October 2009

GLASGRID PAVEMENT REINFORCEMENT CASE STUDY

The Village of Arlington Heights street rehabilitation program included a test section of GlasGrid Pavement Reinforcement System. The development of longitudinal and transverse cracking required the existing surface to be milled up. The GlasGrid, with its' pressure-activated adhesive, was installed between the leveling binder and a 2" overlay on top.

The GlasGrid section will be evaluated on the reduction of reflective cracking and increased pavement life.
