Road Fabrics, Inc.

INSTALLED BY:

Road Fabrics, Inc.

PAVING CONTRACTOR:

Suburban Asphalt

AREA INSTALLED:

14,742 sq. yds.

INSTALLATION DATE:

October 2009

GLASGRID PAVEMENT REINFORCEMENT CASE STUDY

Due to increased traffic and activities, the parking lot and road in Malone Park had developed several longitudinal and transverse cracking. When it came to resurface this area the New Berlin Parks and Recreation Department chose GlasGrid 8501 to help reduce reflective cracking and increase the pavement life. GlasGrid 8501 was installed on a leveling course and a 2" overlay was applied.
