

PROJECT NAME:

Madison Street

LOCATION:

Beaver Dam, WI

AUTHORIZED DEALER:

Road Fabrics, Inc.

INSTALLED BY:

Road Fabrics, Inc.

PAVING CONTRACTOR:

Northeast Asphalt

AREA INSTALLED:

15,100 sq. yds.

INSTALLATION DATE:

August 2010

MIRAPAVE 500 OVERLAY FABRIC CASE STUDY

Madison Street in Beaver Dam, WI is a main arterial road on the southwest side of town. In an effort to help reduce future maintenance costs, City Engineer Ritchie Piltz chose to use a Mirafi MPV 500 paving fabric over the existing milled surface. By incorporating a fabric interlayer in the design you create a moisture barrier and help increase pavement life. Road Fabrics installed the material by first applying a PG 64-22 asphalt cement to the surface at a rate of .25 gal/sq yd. The polypropylene paving fabric was then rolled directly into the liquid asphalt. Following the fabric install, Northeast Asphalt applied a 2" asphalt surface directly over the fabric.
