Road Fabrics, Inc.

INSTALLED BY:

Road Fabrics Inc.

PAVING CONTRACTOR:

Shelly & Sands

AREA INSTALLED:

16,668 sq. yds.

INSTALLATION DATE:

September 2010

TRUPAVE® ENGINEERED PAVING PROJECT PROFILE

The Town of Avon, in an effort to reduce maintenance costs and increase pavement life, chose TruPave Engineered Paving Mat as part of their residential resurfacing project. With the development of longitudinal and transverse cracking, the existing surface was milled up. The town engineers chose TruPave for its' ability to delay reflective cracking from appearing and its' ability to create a moisture barrier. Full width TruPave was installed on a milled surface and topped by an 1.5" surface course. The town will continue to monitor these streets for reflective cracking.
