

**Trumbull™**

**TRUPAVE® ENGINEERED PAVING MAT**  
TRUE PERFORMANCE. TRUE PROTECTION.

**PROJECT NAME:**

Louisiana Route 22

**LOCATION:**

Gonzalas, Louisiana

**AUTHORIZED DEALER:**

Construction Materials, Inc., Dean Hughes  
1.800.375.4004

**INSTALLED BY:**

Road Fabrics, Inc.

**PAVING CONTRACTOR:**

Sullivan Paving Contractors

**AREA INSTALLED:**

69,000 sq. yds.

**EXISTING PAVEMENT TYPE:**

Asphalt

**INSTALLATION DATE:**

July 2005

**TRUPAVE® ENGINEERED PAVING PROJECT PROFILE**

Louisiana's route 22 is a heavily trafficked area in need of repair. The Department of Transportation decided to use *TruPave* Engineered Paving Mat to push any further maintenance farther into the future. *TruPave* Engineered Paving Mat is able to reduce reflective cracking, add pavement strength and create a moisture barrier between the layers of asphalt allowing the DOT to accomplish what they were looking for.

*TruPave* engineered paving mat was left open to traffic from 4 to 7 days prior to the installation of the asphalt overlay (above right picture). No serious tearing or bleed through was noted during this time.
