August 2005

TRUPAVE® ENGINEERED PAVING PROJECT PROFILE

In a joint project between Steele County and the township of Owatonna, Main Street was scheduled to be repaired. Main street is a major artery of the town. The existing concrete base was milled and a asphalt leveling binder was layed out. TruPave Engineered Paving Mat was installed because of its economical, high performance, and practical solution. TruPave was topped off by a 2" lift of asphalt surface.
