PAVING CONTRACTOR:

Al's Asphalt

AREA INSTALLED:

900 sq. yds.

EXISTING PAVEMENT TYPE:

Asphalt

INSTALLATION DATE:

May 2005

TRUPAVE® ENGINEERED PAVING PROJECT PROFILE

The owners of the strip mall were looking for a long term solution to their transverse and longitudinal cracking problem (see picture below). They decided on TruPave Engineered Paving Mat because of TruPave's ability to reduce reflective cracking, add pavement strength and create a moisture barrier between the layers of asphalt. TruPave was placed on top of a leveling binder and covered with 2" of surface.
