

MIRAFI® PGM-G4 WARSAW, IN

Project Profile

Project Name:
Mariners Drive Rehabilitation

Location:
Warsaw, IN

Installed By:
Road Fabrics, Inc.

Paving Contractor:
Phend & Brown

Area Installed:
7,154 Square Yards

Installation Date:
October 2015

Mirafi® PGM-G4 is a composite paving interlayer comprised of a lightweight polypropylene paving fabric reinforced with continuous filament fiberglass, mechanically fastened in the machine, cross and bias angle directions. This unique, patent pending paving interlayer is designed for highly distressed pavement conditions and in addition, the material will provide a moisture barrier against further moisture intrusion. The lightweight polypropylene fabric requires less asphalt tack, saving on installation costs without compromising performance.

The city of Warsaw used PGM-G4 over a concrete road with major cracking. A few concrete slabs were removed due to movement. Mirafi PGM-G4 was placed over the concrete surface once those areas were filled in. 2" of asphalt was placed over the PGM-G4. The road held up beautifully through the winter with no cracks visible after 6 months.
