

## TENSAR TRIAX TX160 WOODRIDGE, IL

### Project Profile

**Project Name:**

Bridgestone Chicago Distribution Center

**Location:**

Woodridge, IL

**Distributed By:**

Road Fabrics Inc

**Engineer:**

Jacob & Hefner Associates

**Area Installed:**

8,975 SY

**Installation Date:**

October 2014

Failures in the parking lot at the Bridgestone Distribution Center led to a reconstruction of the lot. Poor soils called for increased undercuts. The engineers at Jacob & Hefner looked for another solution. Tensor's TriAx TX160 was installed under 12" of 3" stone. After two years the parked lot showed no signs of subgrade failures.

**The TriAx Advantage:**

More owners are selecting TriAx Geogrid to:

- Simplify and speed up construction
- Reduce aggregate fill thickness
- Decrease labor and equipment requirements
- Reduce over excavation and removal requirements
- Enable construction to proceed even in difficult working conditions.
