

TENSAR TRIAX TX140 DUKE REALTY

Project Profile

Project Name:
Duke Realty

Location:
Aurora, IL

Distributed By:
Road Fabrics Inc

Engineer:
Chicago Testing Services

Area Installed:
9,334 SY

Installation Date:
November 2015

Abbey Paving's project for Duke Realty presented a unique problem. The site had been chemically stabilized, but still failed the proof roll. The project manager on the site was looking for a solution that would allow them to maintain the grade and still pass a proof roll. The engineers at Chicago Testing Services suggested Tensar's TriAx TX140 over the treated surface. CA-6 was placed on top of the grid and the section passed the proof roll. The TriAx geogrid was placed on the remainder of the site and the project was completed on time.

The TriAx Advantage:

More owners are selecting TriAx Geogrid to:

- Simplify and speed up construction
- Reduce aggregate fill thickness
- Decrease labor and equipment requirements
- Reduce over excavation and removal requirements
- Enable construction to proceed even in difficult working conditions.
