PRODUCTS

PROVEN
PRODUCTS

NO CHANGES TO OPERATIONS

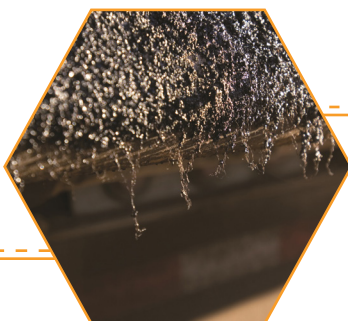

- No change to mix design
- Pre-measured fiber bags
- Used in all working temperatures
- Compatible with both batch and drum plants at all production speeds

EASY TO USE

AUTOMATE THE PROCESS!

Fiber feeder options
available for all
applications

FORTA is built on relationships, each with the same goal: creating better pavement.

FIBER ADDITION

With a variety of options, FORTA can help you streamline and automate the fiber addition process for all applications.

MANUALLY ADD BAGS

With easy-to-use 1lb bags, FORTA-FI can be added directly into a batch plant, pug mill or at the drum plant through the RAP collar. Manually adding the fiber is a great way to fiber-reinforce smaller jobs.

COMPRESSED AIR SYSTEMS

Easy-to-use transport system designed to quickly and safely move FORTA-FI from the ground-level to the batch system within seconds.

BULK FIBER FEEDER

Our own unique loss-in-weight system automatically dispenses the proper amount of fibers with verifiable accuracy. Simply add the fiber to the unit, set the feed rate, and step away. Also available for batch plants.

PROVEN PERFORMANCE

NO FIBER

FORTA-FI[®]

REDUCED CRACKING

NO FIBER

 MATERIALS
 AVAILABLE!**

“Our two hot mix plants have produced several thousand tons of asphalt that included FORTA-FI. We firmly believe that incorporating fibers increases the durability and life of the asphalt.”

“We placed 7,769 tons of 9.5mm wearing on SR 4016 for PennDOT and they were very happy with the product and end result.”
