**REDUCED RUTTING
& CRACKING**

**REDUCED
MAINTENANCE**

**OVERALL
COST SAVINGS**

EXTREME DURABILITY

Roads reinforced with FORTA-FI are able to withstand high traffic volumes with reduced cracking and rutting in comparison to traditional placements.

REDUCED MAINTENANCE

By reducing cracking and rutting you save time and money typically spent on repairs and out of service time.

REDUCED COSTS

Save money upfront by reducing asphalt thickness, or maintain the same thickness with fiber added and save money down the road. Either way FORTA-FI puts money back in your pocket without sacrificing performance.

PROVEN TO PERFORM

INTERSTATE-81

This fiber vs control project was completed in 2013. FORTA-FI exceeded expectations by showing minimal cracking when compared to the control after 4 years of harsh Pennsylvania weather.

PROVEN PERFORMANCE

NO FIBER

Tested in multiple university studies and used around the globe. FORTA-FI is unmatched when it comes to extending the life of your asphalt pavement.

ASPHALT PAVING IS PREFERRED for paving roads, parking lots, and other projects. Asphalt pavement offers the flexibility needed to accommodate imperfections in the underlying surfaces. In addition, asphalt construction projects are less time consuming and less expensive. Whether new construction or repair, asphalt wins every time. With FORTA-FI in the mix get longer-lasting performance and substantial savings of both time and money.

UNMATCHED TECHNICAL SUPPORT

We want to see your project succeed, which is why we offer assistance throughout every step of the process - selling, designing, addition, and placement.

We pride ourselves on maintaining an up-to-date literature database featuring design guidelines and technical documents readily available.

FORTA IS BUILT ON RELATIONSHIPS, EACH WITH THE SAME GOAL: CREATING BETTER PAVEMENT

“We like to joke that our roads are now bulletproof.”

“We will be able to resurface city roads faster than previously anticipated because this new type of paving adds longevity to our roads, provides considerable cost savings, [...] and provides a high-quality product for our citizens.”

“If you could spend a little more upfront to install a better roof that would last several years longer than taking a short cut, wouldn't it be worth it? Shouldn't that type of thinking inform the decisions behind maintaining this country's infrastructure and the health of our highways?”

“We did a couple test roads the first year, one with little traffic and one with more traffic, and where we normally would start to see some cracking, we didn't have any. Once we looked deeper at the costs and benefits of the product, it just made sense.”

WE KNOW YOU CARE ABOUT QUALITY.

WE KNOW YOU CARE ABOUT COSTS.

WE KNOW YOU WANT THE BEST.
